

Mrinal Wahal

Engineering & Philosophy

wahal@localhost:~\$ echo "Golang, GraphQL, Nuxt.js" > expertise.sh

INTERESTS

- Backend Engineering
- Developer Experience
- First Principles
- Computational Philosophy
- Teaching, Public Speaking

SKILLS

- Golang, but language agnostic
- AWS, GCP, Cloud
- GraphQL, Hasura
- Microservices, APIs, Serverless
- DevOps, CI/CD, Containerization
- Systems, Linux, GitOps
- Leadership, Communication, Problem Solving, Teamwork

PERSONAL PROJECTS

- envsecrets.com | [link](#)
- prayaan.co | [link](#)

EDUCATION

Bachelors in Technology

Computer Science & Engineering

EXPERIENCE

envsecrets.com | April'23 - Present

Stack: Golang, Javascript, Hasura/GraphQL, Nuxt (Vue), GCP, GitHub Actions, Vercel

- Founded it as a micro-saas business. Ran it solo from the beginning.
- Open-source end-to-end encrypted platform to manage environment secrets.
- Single-handedly built the entire product. Front-end, landing and the back-end.
- Handled sales, outreach, content and rest of the business myself.
- Tried and failed at setting it up as a legitimate business.

argonaut.dev | November'22 - April'23

Stack: Golang, Kubernetes, AWS, GCP, GitHub Actions

- Senior engineer in the founding team.
- Built support for Keda based auto-scaling for customers' K8 clusters.
- Added support for multiple AWS environments in Argonaut's integration stack.
- Built a debugging/operations job procedure to allow users to troubleshoot their K8 clusters using K9s.

locale.ai | June'22 - October'22

Stack: Java (Quarkus), Hasura (GraphQL), Kubernetes, GCP, Pub/Sub, Python

- Senior backend engineer. Lead a team of junior engineers.
- Designed and maintained the entire schema for v2.0 using Hasura (GraphQL).
- Architected message queues/brokers. Wrote and maintained consumer services.

----- 4 month break to work on prayaan.co -----

Nhost.io, Stockholm | May'21 - February'22 | [Link](#)

Stack: Golang, Hasura (GraphQL), AWS, GitHub Actions, Docker, Shell Scripts

- Second core team member.
- Designed and maintained the Nhost CLI from scratch.
- Contributed to all of Nhost stack, including front-end SDKs, auth and storage.

oversight.in - Founder & CEO | August'19 - April'21 | [Link](#)

Stack: Nuxt.js, Golang, Hasura (GraphQL), AWS (EC2, RDS, ELB), Razorpay (payments).

- Co-founded it with my friend. Ran it as the CEO throughout.
- CMS for research collaboration to allow scientists, faculties and students to collaborate on each other's research through mentorship, internships or professional collaboration.

InstantPost, Bangalore | January'18 - January'19

Stack: Python, Headless Servers, Docker, LXC, Ubuntu, RHEL, OpenSSH.

- Automated remote servers across India for a production-ready edge-computing environment. Handling load balancing, health monitoring, fault tolerance, auto-scaling of services and secure server-to-server connections.

PATENTS

Hydra | Under Examination | [Link](#)

Modern resilient anonymous network routing protocol for enhanced security, reduced latency by overcoming the shortfalls of the infamous Onion Router (TOR).
